- UI/UX
- FIGMA
- MANUAL TESTING

Objective

Aspiring full-stack developer seeking to join a project-based team where I can design and develop dynamic web and mobile systems. With experience in front-end design, database management, and manual testing, I aim to contribute to building secure, high-quality solutions while further expanding my expertise in modern frameworks and GitHub-based workflows.

Experience

Real Estate Document Encoder:
(Real Estate Division)   2024 - 2025

- Verified property details and input info.
- Managed large volumes of real estate paperwork.
- Verified data accuracy

Admin Aide (Internship)
EMI Yazaki Eds Manufacturing Inc.   March - June 2025

- Assisted in data entry and updating reports in the system.
- Reported system issues and helped the MIS team fix errors.
- Prepared and submitted daily and hourly output updates.

Academic Projects

University Website
NSTP Cavite State University   2022

- Designed and developed the frontend UI/UX for a university web prototype.
- Collaborated on integrating frontend with backend functionalities.
- Ensured responsive and user-friendly interface across devices.

ICSM Creatives : Booking Management
Capstone Project   2023-2025

- Developed the system as Full Stack Web Developer, handling both frontend and backend.
- Designed and managed the database architecture to support booking and reporting.
- Created the overall UI/UX design, ensuring usability and efficiency for end users.
